and then there were none worksheet: Teaching Political Science to Undergraduates Laure Paquette, 2016-01-15 By 2020, half of the world's population and most university students will have a supercomputer in their pockets. This revolution will affect the way students respond to higher education. The university classroom must henceforth engage students, and the classic lecture format alone might not be enough to do so. This book answers the question how university students can learn in the classroom what they cannot learn in any other way. The answer is inspired by options that are not available to political scientists - in the way that they are in the laboratories for the sciences, in the performances for the live arts, and in the studios for visual arts - as well as ideas that are already present, but not widespread in the discipline: problem-solving and case studies, as in the professional schools, and simulation exercises in many other disciplines. This book proposes therefore an active pedagogy for political science, at a time when active pedagogy is more important than ever. Prof. Laure Paquette, PhD, has been a visiting researcher or professor in 23 countries. She has advised several foreign governments as well as her own, Canada, and has published extensively in four languages. This is her sixteenth book.

This book examines the actual hate crime while illustrating the secret interworkings of several authentic white supremacist groups including the Ku Klux Klan, the National Alliance and Volksfront. While the crime story evolves so does the narrative of the institutional racism that permeates society in the United States, in both past and present eras, and alarmingly through institutions such as Planned Parenthood. This deeply documented book includes academic footnotes for readers that would like to follow the reality of American racism today. This work contains an in depth look at the life of a young Skinhead girl from various perspectives including her beliefs on religion, politics and race. *Skinhead Girl* tells the story of a devoutly religious white supremacist family which is using newfound tactics and technology to reign terror on those that they consider members of inferior races. J.W. Gregory provides a realistic version of racism and

argues that although Americans may assume that because the U.S. has an African-American in the White House that racism is no longer a problem, while in reality the number of white supremacist groups grow in number year after year. White supremacist groups continue to use their system of the secretive cellular divide while permeating into the very fabric of America. Skinhead girl believes that every individual action makes a difference in what she sees as Americas white power race war.
