a peoples history of the united states audio: A People's History of Computing in the United States Joy Lisi Rankin, 2018-10-08 Silicon Valley gets all the credit for digital creativity, but this account of the pre-PC world, when computing meant more than using mature consumer technology, challenges that triumphalism. The invention of the personal computer liberated users from corporate mainframes and brought computing into homes. But throughout the 1960s and 1970s a diverse group of teachers and students working together on academic computing systems conducted many of the activities we now recognize as personal and social computing. Their networks were centered in New Hampshire, Minnesota, and Illinois, but they connected far-flung users. Joy Rankin draws on detailed records to explore how users exchanged messages, programmed music and poems, fostered communities, and developed computer games like *The Oregon Trail*. These unsung pioneers helped shape our digital world, just as much as the inventors, garage hobbyists, and eccentric billionaires of Palo Alto. By imagining computing as an interactive commons, the early denizens of the digital realm seeded today's debate about whether the internet

should be a public utility and laid the groundwork for the concept of net neutrality. Rankin offers a radical precedent for a more democratic digital culture, and new models for the next generation of activists, educators, coders, and makers.

a peoples history of the united states audio: Consuming History Jerome de Groot, 2009-01-13 Non-academic history – ‘public history’ – is a complex, dynamic entity which impacts on the popular understanding of the past at all levels. In *Consuming History*, Jerome de Groot examines how society consumes history and how a reading of this consumption can help us understand popular culture and issues of representation. This book analyzes a wide range of cultural entities – from computer games to daytime television, from blockbuster fictional narratives such as *Da Vinci Code* to DNA genealogical tools – to analyze how history works in contemporary popular culture. Jerome de Groot probes how museums have responded to the heritage debate and the way in which new technologies have brought about a shift in access to history, from online game playing to internet genealogy. He discusses the often conflicted relationship between ‘public’ and academic history, and raises important questions about the theory and practice of history as a discipline. Whilst mainly focussing on the UK, the book also compares the experiences of the USA, France and Germany. *Consuming History* is an important and engaging analysis of the social consumption of history and offers an essential path through the debates for readers interested in history, cultural studies and the media.

a peoples history of the united states audio: Loudmouth Deborah Heiligman, 2025-09-16 Both a love letter to America and a stirring rallying cry for the country to live up to the ideals on which it was founded, this propulsive biography from National Book Award Finalist and "nonfiction maestro (Horn Book) Deborah Heiligman chronicles the extraordinary life and work of groundbreaking political activist Emma Goldman. □ "Heiligman's latest . . . solidifies her as one of the absolute best in the business . . . Loudmouth is a master class." —Booklist, starred review Emma Goldman made trouble her whole life. The first time was by accident. Her birth (in Lithuania, in 1869) angered her father. He had wanted a dutiful son, not a headstrong daughter. The other times were on purpose. When she arrived in America as a young woman, she loved its democratic ideals but was appalled by its hypocrisy. Life, liberty, and the pursuit of happiness seemed to be only for those at the top. Something had to be done for everyone else. Someone had to speak up. Soon Emma was delivering rousing speeches on topics like workers' rights, feminism, and the atrocities of capitalism. This is the story of Emma's complex love affair with America. It's also the story of her many romances with the men she met while trying to change America. Emma believed marriage was disempowering to women and lived her life according to the principles of free love. Emma called herself an anarchist and a freethinker. Her critics called her a troublemaker, a "loudmouth." But sometimes you need to be loud, if you want your voice to be heard. Deborah Heiligman is a National Book Award finalist, a YALSA Nonfiction Award winner, and a Printz Honor winner. In Loudmouth she tells the extraordinary true story of a woman who was a fearsome fighter for change in her complicated new country—and a complicated human being in her own right. This is an essential read for young people—or for anyone—who wants to use their voice to make the world a better place.

Unique and theoretically grounded, the book presents many opportunities to weave the ideas of Freire into the fabric of K-12 schooling.

a peoples history of the united states audio: Howard Zinn on History Howard Zinn, 2011-06-14 Howard Zinn began work on his first book for his friends at Seven Stories Press in 1996, a big volume collecting all his shorter writings organized by subject. The themes he chose reflected his lifelong concerns: war, history, law, class, means and ends, and race. Throughout his life Zinn had returned again and again to these subjects, continually probing and questioning yet rarely reversing his convictions or the vision that informed them. The result was *The Zinn Reader*. Five years later, starting with *Howard Zinn on History*, updated editions of sections of that mammoth tome were published in inexpensive stand-alone editions. This second edition of *Howard Zinn on History* brings together twenty-seven short writings on activism, electoral politics, the Holocaust, Marxism, the Iraq War, and the role of the historian, as well as portraits of Eugene Debs, John Reed, and Jack London, effectively showing how Zinn's approach to history evolved over nearly half a century, and at the same time sharing his fundamental thinking that social movements—people getting together for peace and social justice—can change the course of history. That core belief never changed. Chosen by Zinn himself as the shorter writings on history he believed to have enduring value—originally appearing in newspapers like the *Boston Globe* or the *New York Times*; in magazines like *Z*, the *New Left*, the *Progressive*, or the *Nation*; or in his book *Failure to Quit*—these essays appear here as examples of the kind of passionate engagement he believed all historians, and indeed all citizens of whatever profession, need to have, standing in sharp contrast to the notion of objective or neutral history espoused by some. It is time that we scholars begin to earn our keep in this world, he writes in *The Uses of Scholarship*. And in *Freedom Schools*, about his experiences teaching in Mississippi during the remarkable Freedom Summer of 1964, he adds: Education can, and should, be dangerous.
