life on the line grant achatz: Life, on the Line Grant Achatz, Nick Kokonas, 2012-03-06 One of America's great chefs (Vogue) shares how his drive to cook immaculate food won him international renown-and fueled his miraculous triumph over tongue cancer. In 2007, chef Grant Achatz seemingly had it made. He had been named one of the best new chefs in America by Food & Wine in 2002, received the James Beard Foundation Rising Star Chef of the Year Award in 2003, and in 2005 he and Nick Kokonas opened the conceptually radical restaurant Alinea, which was named Best Restaurant in America by Gourmet magazine. Then, positioned firmly in the world's culinary spotlight, Achatz was diagnosed with stage IV squamous cell carcinoma-tongue cancer. The prognosis was grim, and doctors agreed the only course of action was to remove the cancerous tissue, which included his entire tongue. Desperate to preserve his quality of life, Grant undertook an alternative treatment of aggressive chemotherapy and radiation. But the choice came at a cost. Skin peeled from the inside of Grant's mouth and throat, he rapidly lost weight, and most alarmingly, he lost his sense of taste. Tapping into the discipline, passion, and focus of being a chef, Grant rarely missed a day of work. He trained his chefs to mimic his palate and learned how to cook with his other senses. As Kokonas was able to attest: The food was never better. Five months later, Grant was declared cancer-free, and just a few months following, he received the James Beard Foundation Outstanding Chef in America Award. *Life, on the Line* tells the story of a culinary trailblazer's love affair with cooking, but it is also a book about survival, about nurturing creativity, and about profound friendship. Already much- anticipated by followers of progressive cuisine, Grant and Nick's gripping narrative is filled with stories from the world's most renowned kitchens-The French Laundry, Charlie Trotter's, el Bulli- and sure to expand the audience that made Alinea the number-one selling restaurant cookbook in America last year. life on the line grant achatz: Culinary Man and the Kitchen Brigade Jordan Fallon, 2024-09-23 Culinary Man and the Kitchen Brigade offers an exploration of the field of normative subjectivity circulated within western fine dining traditions, presenting a theoretical analysis of the governing relationship between the chef, who embodies the Culinary Man, and the fine dining brigade. The book offers a unique treatment of western haute cuisine's interlocking regime of labor

and aesthetics and theorizes the underexplored kitchen brigade as a model of disciplinary formation. It deploys a heterogeneous set of disciplinary discourses and practices which have the effect of consolidating monopolies on epistemic authority and governance. Each position within the brigade's hierarchy is subject to distinct, though related, disciplinary practices. Thus, chapters identify the specific practices pertinent to each brigade subject, while also illuminating how they fit together as a coherent hegemonic project. The application of Wynterian and Foucauldian insight to the fine dining brigade offers a political theory of culinary work which departs from other food studies texts. Notably, this work offers an in-depth treatment of the brigade's colonial dimensions which resonate with emerging critiques, scholarly and general, of the race and gender politics of restaurant labor. The concluding chapters seek to identify where extant modes of resistance or alternative forms of culinary organization may hold the potential to move beyond the hegemonic overrepresentation of Culinary Man. This book will be of great interest to students and scholars from across the social sciences and humanities interested in critical food studies, political and cultural theory, and popular culinary culture.

life on the line grant achatz: Alimentary Performances Kristin Hunt, 2018-06-12 A pea soda. An apple balloon. A cotton candy picnic. A magical mole. These are just a handful of examples of mimetic cuisine, a diverse set of culinary practices in which chefs and artists treat food as a means of representation. As theatricalised fine dining and the use of food in theatrical situations both grow in popularity, *Alimentary Performances* traces the origins and implications of food as a mimetic medium, used to imitate, represent, and assume a role in both theatrical and broader performance situations. Kristin Hunt's rich and wide-ranging account of food's growing representational stakes asks: What culinary approaches to mimesis can tell us about enduring philosophical debates around knowledge and authenticity How the dramaturgy of food within theatres connects with the developing role of theatrical cuisine in restaurant settings Ways in which these turns toward culinary mimeticism engender new histories, advance new epistemologies, and enable new modes of multisensory spectatorship and participation. This is an essential study for anyone interested in the intersections between food, theatre, and performance, from fine dining to fan culture and celebrity chefs to the drama of the cookbook.

life on the line grant achatz: The End of Work John Tamny, 2018-05-07 From the author of *Popular Economics* comes a surprisingly sunny projection of America's future job market. Forget the doomsday predictions of sour-faced nostalgists who say automization and globalization will take away your dream job. The job market is only going to get better and better, according to economist John Tamny, who argues in *The End of Work* that the greatest gift of prosperity, beyond freedom from painful want, is the existence of work that is interesting.

life on the line grant achatz: The Lean Farm Ben Hartman, 2015 A practical, systems-based approach for a more sustainable farming operation To many people today, using the words factory and farm in the same sentence is nothing short of sacrilege. In many cases, though, the same sound business practices apply whether you are producing cars or carrots. Author Ben Hartman and other young farmers are increasingly finding that incorporating the best new ideas from business into their farming can drastically cut their wastes and increase their profits, making their farms more environmentally and economically sustainable. By explaining the lean system for identifying and eliminating waste and introducing efficiency in every aspect of the farm operation, *The Lean Farm* makes the case that small-scale farming can be an attractive career option for young people who are interested in growing food for their community. Working smarter, not harder, also prevents the kind of burnout that start-up farmers often encounter in the face of long, hard, backbreaking labor. Lean principles grew out of the Japanese automotive industry, but they are now being followed on progressive farms around the world. Using examples from his own family's one-acre community-supported farm in Indiana, Hartman clearly instructs other small farmers in how to incorporate lean practices in each step of their production chain, from starting a farm and harvesting crops to training employees and selling goods. While the intended audience for this book is small-scale farmers who are part of the growing local food movement, Hartman's prescriptions for

high-value, low-cost production apply to farms and businesses of almost any size or scale that hope to harness the power of lean in their production processes.

life on the line grant achatz: Food and Masculinity in Contemporary Autobiographies Nieves Pascual Soler, 2017-12-12 This book is concerned with food autobiographies written by men from the 1980s to the present. It concentrates on how food has transformed autobiographical narratives and how these define the ways men eat and cook nowadays. After presenting a historical overview of the place of food within men's autobiography, this volume analyzes the reasons for our present interest in food and the proliferation of life narratives focused on cooking. Then it centers around the identities that male chefs are taking on in the writing of their lives and the generic models they use: the heroic, the criminal and the hunting autobiographical scripts. This study gives evidence that autobiographies are crucial in the redefinition of the new masculinities emerging in the kitchen. It will appeal to readers interested in Food Studies, Autobiographical Studies, Men's Studies and American Literature and Culture.

exclusively a product of growing old. The usual onset is between the ages of nineteen and forty-four, and in many cases the cause is unknown. *Shouting Won't Help* is a deftly written, deeply felt look at a widespread and misunderstood phenomenon. In the style of Jerome Groopman and Atul Gawande, and using her experience as a guide, Bouton examines the problem personally, psychologically, and physiologically. She speaks with doctors, audiologists, and neurobiologists, and with a variety of people afflicted with midlife hearing loss, braiding their stories with her own to illuminate the startling effects of the condition. The result is a surprisingly engaging account of what it's like to live with an invisible disability—and a robust prescription for our nation's increasing problem with deafness. life on the line grant achatz: *Popular Economics* John Tamny, 2015-04-13 “John Tamny is a one-man antidote to economic obfuscation and mystification.” —George Will, Nationally Syndicated Columnist “In spirit, Tamny does for economics what the Gutenberg printing press did for the Bible, making a previously inaccessible subject open to all. Equally important, he does to economists what Toto did to the Wizard of Oz: pulling aside the curtain to expose the fraud that has become modern economics.” —Steve Forbes, Chairman and Editor-in-Chief, Forbes Media “Ignore John Tamny’s easy to read *Popular Economics* at your own moral peril. It’s as close to spiritual as you get in this realm—a better tutorial than any econ text.” - Ken Fisher, Founder & CEO, Fisher Investments “John’s book is many things. It’s a great way to learn economics, it’s a very strong case for economic liberty, and it is an epic myth-buster. I will be giving it out to friends, of all viewpoints, for a long, long time.” - Cliff Asness, Managing Principal, AQR Capital *ECONOMICS 101* In *Popular Economics: What the Rolling Stones, Downton Abbey, and LeBron James Can Teach You About Economics* (Regnery Publishing; April 13, 2015; \$27.99) Tamny translates the so-called difficult and intimidating subject of economics into plain language, revealing that there is nothing mysterious about finance, commerce, and budgets. In fact, we are all microeconomists in our daily lives. “Economics is easy, and its lessons are all around us,” says Tamny. “But Americans have allowed the so-called ‘experts’ to convince them they can’t understand, much less grow the economy. Happily, economic growth is simple, too. If you can understand the four basic elements of economic growth—taxes, regulation, trade, and money—prosperity will explode.” Much like *Freakonomics*, Tamny uses pop culture and engaging stories to illustrate how understanding our economy is common sense—just look no further than the movies we enjoy, the sports we watch, and what we do every day. In *Popular Economics*, you’ll discover: How Paris Hilton and the Dallas Cowboys help illustrate good and bad tax policy How Facebook and Monday Night Football demonstrate the debilitating effect of antitrust regulation How the simple act of cooking chicken wings reveals why the “floating dollar” is a recipe for disaster Why Downton Abbey and ESPN are evidence that the U.S. should bulldoze its tax code

life on the line grant achatz: *Style and Sense(s)* Linda Pillière, Sandrine Sorlin, 2024-05-09 This edited volume celebrates cutting-edge research in stylistics and, more specifically, recent work on sense and the senses. The title originated in the Poetics and Linguistics Association (PALA) 2022 conference and marks the 40th onsite event by showcasing some of the excellent papers delivered on that occasion. The selected chapters fall into 4 parts each of which gives pride of place to how style makes sense and how senses make style. The chapters follow research in neuroscience and sociocognition, investigate how body and mind are inextricably linked through embodied meaning; how emotions are both conveyed and perceived; and how impressions, thoughts and worldviews can be induced by a certain style. The apprehension of the senses is carried through a variety of theories (cognitive linguistics and stylistics, ecostylistics, phenomenology, simulation theory, enactivism, metaphor theory, Text World Theory) and is applied to various genres (poetry, novels, short stories, detectivefiction, restaurant reviews) and media (the oral vs written tradition, ekphrasis, and semiotic transfers). This book will be of interest to students and academics in stylistics, cognitive linguistics, discourse analysis, ecostylistics, and multimodality.
