Schlesinger, 1999-06-16 A Pulitzer Prize-winning historian discusses “the Cold War, political parties, the presidency, and many broader philosophical issues [with] incisive wit” (Library Journal). A celebrated historian, speechwriter, and adviser to President Kennedy, Arthur M. Schlesinger Jr. draws on decades of astute observation to construct a dialectic of American politics, or as Time magazine called it, a “recurring struggle between pragmatism and idealism in the American soul.” The Cycles of American History traces two conflicting visions of America—Experiment vs. Destiny—through two centuries of political evolution, conflict, and progress. hnh american history textbook: *Contested Curriculum* Don Romesburg, 2025-04-15 Today, many states have proposed so-called “Don’t Say Gay” bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom. But a few states, like California, have taken decisive steps in the other direction. They mandate inclusive education that treats LGBTQ history as essential to the curriculum. At once a history of an evolving movement and an activist handbook, *Contested Curriculum* navigates the rocky path to LGBTQ-inclusive K-12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives. What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California’s landmark FAIR Education Act in 2011, ensuring that LGBTQ history has a place in the K-12 classroom. Historian Don Romesburg, the lead scholar who worked with advocacy organizations to pass the act, recounts the decades-long struggle to integrate LGBTQ content into history education policy, textbooks, and classrooms. Looking at California and states that followed its lead, he assesses the challenges and opportunities presented by this new way of teaching history. Romesburg’s powerful case for LGBTQ-inclusive education is all the more urgent in this era of anti-gay book bans, regressive legislation, and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation.

hmh american history textbook: *Negotiating Ethnic Diversity and National Identity in History Education* Helen Mu Hung Ting, Luigi Cajani, 2023-05-26 This edited book explores the problems and challenges of negotiating the representation of ethnic minorities within history education. It investigates how states balance the (non-)acknowledgement of the reality of cultural or religious diversity, and the promotion of a point of convergence in history education to foster national identity. Shifting our attention away from the intractable challenges posed by post-conflict countries for reconciliation, the contributors draw attention to the need to explore ways to prevent or pre-empt conflicts and exclusion through history education, which could contribute to developing a more sustainable culture of peace. Drawing on a wide range of contexts and sources, this book asks how history education could contribute to forming critical, historically informed, and committed young citizens. The book will be of interest to students and academics working on themes such as nationalism, citizenship, ethnicity, history education, multicultural education, peace studies and area studies, as well as practitioners in the fields of history, social studies, civic or citizenship.
