

mitosis versus meiosis worksheet

Mitosis Versus Meiosis Worksheet: A Handy Guide to Understanding Cell Division

mitosis versus meiosis worksheet is a popular educational tool that helps students grasp the fundamental differences and similarities between two essential types of cell division. Whether you're a student trying to memorize complex biological processes or a teacher looking for effective ways to convey this knowledge, such worksheets can be incredibly valuable. By breaking down the stages, comparing the outcomes, and reinforcing key concepts, a well-crafted mitosis versus meiosis worksheet makes learning about cell division more accessible and engaging.

Why Use a Mitosis Versus Meiosis Worksheet?

Understanding the intricacies of mitosis and meiosis can be challenging because both processes involve multiple stages, specific terminology, and significant biological implications. A worksheet serves as a structured resource that allows learners to:

- Visualize the phases of each type of cell division.
- Compare and contrast key features side by side.
- Test their knowledge through questions and activities.
- Reinforce understanding through repetition and practice.

In classrooms, worksheets tailored to mitosis versus meiosis not only support active learning but also cater to different learning styles by combining textual explanations, diagrams, and interactive exercises.

Breaking Down Mitosis and Meiosis

Before diving into how a worksheet can help, it's useful to briefly revisit what mitosis and meiosis entail.

What is Mitosis?

Mitosis is a process of cell division resulting in two genetically identical daughter cells, each with the same number of chromosomes as the parent cell. It is crucial for growth, repair, and asexual reproduction in multicellular organisms. The stages of mitosis include:

1. Prophase
2. Metaphase
3. Anaphase
4. Telophase

Each phase involves specific events, such as chromosome condensation, alignment at the metaphase

plate, separation of sister chromatids, and formation of new nuclei.

What is Meiosis?

Meiosis, on the other hand, is a specialized form of cell division that reduces the chromosome number by half, producing four genetically diverse daughter cells called gametes (sperm and eggs). This process is vital for sexual reproduction and genetic variation. Meiosis consists of two consecutive divisions: Meiosis I and Meiosis II, each with prophase, metaphase, anaphase, and telophase stages.

An essential feature of meiosis is crossing over during prophase I, where homologous chromosomes exchange genetic material, increasing genetic diversity.

How a Mitosis Versus Meiosis Worksheet Enhances Learning

A worksheet designed to compare mitosis and meiosis offers several educational benefits:

Visual Comparisons Through Diagrams

Diagrams depicting each phase of mitosis and meiosis help learners visualize the processes. Worksheets often include blank or labeled diagrams where students can identify stages or label parts such as chromosomes, spindle fibers, and centrioles. This spatial understanding is crucial because cell division is dynamic and spatially complex.

Side-by-Side Feature Comparison

A common feature in these worksheets is a comparison chart. This chart lists attributes such as:

- Number of daughter cells produced
- Chromosome number in daughter cells relative to parent
- Genetic similarity or diversity of daughter cells
- Purpose of the division (growth, repair, reproduction)
- Number of division cycles
- Occurrence of crossing over

By filling in or reviewing such charts, students can clearly see how mitosis and meiosis differ and why those differences matter biologically.

Interactive Questions and Critical Thinking

Beyond recall-based questions, effective mitosis versus meiosis worksheets include critical thinking prompts. Examples might be:

- Explain why meiosis is necessary for sexual reproduction.
- Describe what would happen if mitosis resulted in genetically varied daughter cells.
- Predict the consequences of errors in chromosome separation during meiosis.

These types of questions encourage learners to apply their knowledge and understand the biological significance of these processes.

Tips for Creating or Using a Mitosis Versus Meiosis Worksheet

Whether you're a teacher designing your own worksheet or a student using one, certain strategies can maximize its effectiveness.

Incorporate Varied Learning Modalities

Use a mixture of text, images, and hands-on activities. For example, asking students to draw phases, match terms to definitions, or sequence the steps can cater to visual and kinesthetic learners.

Use Real-World Examples

Relate concepts to real-life scenarios, such as:

- How skin cells regenerate through mitosis.
- The importance of genetic diversity from meiosis in adapting to environmental changes.

This connection makes the material more relatable and memorable.

Encourage Group Discussions

Working through a mitosis versus meiosis worksheet in groups allows students to discuss and clarify doubts. Explaining concepts to peers reinforces understanding and uncovers misconceptions.

Regular Review and Practice

Cell division is a topic that benefits from repeated exposure. Using worksheets periodically helps

reinforce learning and track progress.

Examples of Common Sections in a Mitosis Versus Meiosis Worksheet

To give a clearer picture, here are some typical components you might find:

- **Labeling Diagrams:** Students label stages of mitosis and meiosis.
- **Fill-in-the-Blanks:** Sentences describing processes with missing key terms.
- **Comparison Tables:** Side-by-side features of mitosis and meiosis.
- **Multiple Choice Questions:** Testing definitions and functions.
- **Short Answer Questions:** Explaining biological significance.
- **True or False Statements:** To assess common misconceptions.

These varied formats help reinforce different aspects of learning — from memorization to comprehension.

Integrating Technology with Mitosis Versus Meiosis Worksheets

With the rise of digital learning, many educators are incorporating online interactive worksheets. These often include drag-and-drop activities, animations showing each phase in motion, and instant feedback on quizzes. Such resources can complement traditional worksheets, making the learning experience more dynamic.

Additionally, digital worksheets can be customized to suit different grade levels or learning paces, providing scaffolding for students who need extra help or advanced challenges for those ready to dive deeper.

Final Thoughts on Using Mitosis Versus Meiosis Worksheets

Learning about mitosis and meiosis is fundamental to understanding biology, genetics, and the continuity of life. A mitosis versus meiosis worksheet, when thoughtfully designed and actively used, can transform a complex topic into an approachable and even enjoyable learning experience. By

combining visual aids, comparative charts, and critical thinking questions, these worksheets help cement knowledge in a way that memorization alone cannot achieve.

Whether you're preparing for exams, teaching a class, or simply curious about how cells divide, incorporating such worksheets into your study routine will provide clarity and confidence. Remember, the key lies in engaging with the material actively — labeling diagrams, answering questions, and reflecting on how these cellular processes impact the living world around us.

Frequently Asked Questions

What is the main purpose of a mitosis versus meiosis worksheet?

A mitosis versus meiosis worksheet is designed to help students understand and compare the processes, stages, and outcomes of mitosis and meiosis, reinforcing key concepts in cell division.

How does a mitosis versus meiosis worksheet help in learning biology?

It provides structured exercises that clarify differences and similarities between mitosis and meiosis, aiding students in grasping complex biological processes through diagrams, labeling, and comparison questions.

What are common topics covered in a mitosis versus meiosis worksheet?

Common topics include the number of cell divisions, chromosome number changes, purpose of each process, stages involved, and outcomes such as the number and genetic makeup of daughter cells.

Can a mitosis versus meiosis worksheet include diagram labeling?

Yes, many worksheets include diagrams of mitosis and meiosis stages for students to label, helping them visually distinguish the phases and structural differences.

Why is it important to understand the differences between mitosis and meiosis using worksheets?

Understanding these differences is crucial for comprehending cell reproduction, genetic variation, and inheritance, and worksheets provide practice to reinforce these important biological concepts.

Are mitosis versus meiosis worksheets suitable for all

education levels?

They are typically tailored for middle school to high school students, with varying complexity depending on the curriculum and depth of study required.

Where can educators find quality mitosis versus meiosis worksheets?

Educators can find quality worksheets on educational websites, science teaching platforms, and through online resources like Teachers Pay Teachers or educational PDF repositories.

Additional Resources

Mitosis Versus Meiosis Worksheet: An Analytical Review for Educators and Students

mitosis versus meiosis worksheet resources have become indispensable tools in biology education, providing students with structured opportunities to distinguish between two fundamental cellular processes. These worksheets are designed not only to reinforce theoretical knowledge but also to enhance critical thinking through comparative analysis. As educators seek effective means to clarify the nuances of cell division, the role of comprehensive mitosis versus meiosis worksheets warrants a closer examination.

Understanding the Purpose of Mitosis Versus Meiosis Worksheets

In the study of cell biology, mitosis and meiosis represent pivotal mechanisms that govern cellular replication and genetic variation respectively. A mitosis versus meiosis worksheet typically serves as an educational scaffold, guiding learners through the complexities of these processes. By presenting side-by-side comparisons, diagrams, and targeted questions, such worksheets aim to illuminate differences in function, stages, outcomes, and biological significance.

The integration of these worksheets in curriculum settings helps address common misconceptions. For instance, many students struggle to differentiate the phases of mitosis and meiosis or to grasp why meiosis results in genetic diversity while mitosis produces identical daughter cells. The worksheet format, often interactive and visually oriented, caters to diverse learning styles, promoting retention and comprehension.

Key Features of an Effective Mitosis Versus Meiosis Worksheet

An effective worksheet that contrasts mitosis and meiosis typically includes several critical components:

- **Clear Definitions:** Concise explanations of mitosis and meiosis establish foundational

understanding.

- **Stage-by-Stage Comparisons:** Detailed breakdowns of phases such as prophase, metaphase, anaphase, and telophase for both processes.
- **Visual Aids:** Diagrams or illustrations that depict chromosome behavior and cell division stages help in visual learning.
- **Application Questions:** Analytical prompts that encourage learners to apply concepts, such as predicting outcomes of cellular division scenarios.
- **Terminology Integration:** Inclusion of key terms like “homologous chromosomes,” “crossing over,” and “daughter cells” to reinforce vocabulary.

These features collectively enhance the worksheet’s ability to facilitate a deep, comparative understanding of mitosis and meiosis.

Comparative Analysis: Using Worksheets to Highlight Differences and Similarities

Mitosis and meiosis, while both forms of cell division, differ fundamentally in their purpose and outcomes. Worksheets that systematically compare these aspects enable students to internalize critical distinctions.

Purpose and Biological Roles

Mitosis is primarily concerned with growth, tissue repair, and asexual reproduction, generating two genetically identical diploid daughter cells. Meiosis, in contrast, is fundamental to sexual reproduction, producing four genetically diverse haploid gametes. Worksheets often emphasize this contrast through scenario-based questions, asking learners to identify which process would occur in different biological contexts.

Stages and Chromosomal Behavior

While both processes share similarly named stages—prophase, metaphase, anaphase, telophase—the mechanics differ notably. Meiosis involves two rounds of division (meiosis I and meiosis II), with crossing over occurring during prophase I, promoting genetic recombination. Worksheets that include detailed diagrams allow students to visually parse these differences, such as the pairing of homologous chromosomes exclusive to meiosis.

Outcomes and Genetic Implications

A critical learning objective is understanding that mitosis results in daughter cells identical to the parent cell, maintaining chromosome number, whereas meiosis reduces chromosome number by half and introduces genetic variability. Worksheets that incorporate problem-solving exercises, such as determining chromosome numbers post-division or predicting genetic diversity outcomes, reinforce this concept.

Benefits of Incorporating Mitosis Versus Meiosis Worksheets in Educational Settings

The strategic use of mitosis versus meiosis worksheets offers several pedagogical advantages:

- **Enhanced Conceptual Clarity:** The structured format aids in breaking down complex biological processes into manageable segments.
- **Active Learning:** Interactive elements in worksheets encourage student engagement beyond passive reading.
- **Assessment Readiness:** Worksheets serve as formative assessments, allowing instructors to gauge understanding and identify areas needing reinforcement.
- **Visual Learning Support:** For visual learners, diagrams and charts embedded in worksheets provide critical cognitive support.
- **Facilitation of Comparative Thinking:** Direct side-by-side presentation of mitosis and meiosis promotes analytical skills essential in scientific study.

Moreover, worksheets are adaptable to various educational levels, from middle school biology curricula to advanced high school and introductory college courses.

Potential Challenges and Considerations

While mitosis versus meiosis worksheets are valuable, educators should be mindful of potential limitations:

- **Oversimplification:** Some worksheets may inadequately capture the complexity of meiosis, such as the nuances of genetic recombination.
- **Student Misinterpretation:** Without proper guidance, learners might conflate stages or overlook critical distinctions.

- **Variation in Quality:** The effectiveness of worksheets depends heavily on their design quality and alignment with learning objectives.

Therefore, selecting or customizing worksheets to suit specific classroom needs is crucial for maximizing educational impact.

Integrating Technology with Mitosis Versus Meiosis Worksheets

The digital transformation in education has influenced how mitosis versus meiosis worksheets are delivered and utilized. Interactive online worksheets incorporate animations, drag-and-drop activities, and instant feedback, making the learning process more dynamic.

Educators leveraging platforms with digital worksheets benefit from:

- Real-time assessment data to track student progress.
- Accessibility features accommodating diverse learner needs.
- Engaging multimedia content that supplements traditional text and images.

Such integration enhances comprehension, especially for abstract biological concepts that benefit from dynamic visualizations.

The evolving landscape of biology education suggests that mitosis versus meiosis worksheets will continue to adapt, incorporating innovative approaches to meet the demands of contemporary learners while maintaining their foundational role in reinforcing core scientific knowledge.

mitosis versus meiosis worksheet: The Science Teacher's Toolbox Tara C. Dale, Mandi S. White, 2020-04-28 A winning educational formula of engaging lessons and powerful strategies for science teachers in numerous classroom settings The Teacher's Toolbox series is an innovative, research-based resource providing teachers with instructional strategies for students of all levels and abilities. Each book in the collection focuses on a specific content area. Clear, concise guidance enables teachers to quickly integrate low-prep, high-value lessons and strategies in their middle

school and high school classrooms. Every strategy follows a practical, how-to format established by the series editors. The Science Teacher's Toolbox is a classroom-tested resource offering hundreds of accessible, student-friendly lessons and strategies that can be implemented in a variety of educational settings. Concise chapters fully explain the research basis, necessary technology, Next Generation Science Standards correlation, and implementation of each lesson and strategy. Favoring a hands-on approach, this book provides step-by-step instructions that help teachers to apply their new skills and knowledge in their classrooms immediately. Lessons cover topics such as setting up labs, conducting experiments, using graphs, analyzing data, writing lab reports, incorporating technology, assessing student learning, teaching all-ability students, and much more. This book enables science teachers to: Understand how each strategy works in the classroom and avoid common mistakes Promote culturally responsive classrooms Activate and enhance prior knowledge Bring fresh and engaging activities into the classroom and the science lab Written by respected authors and educators, The Science Teacher's Toolbox: Hundreds of Practical Ideas to Support Your Students is an invaluable aid for upper elementary, middle school, and high school science educators as well those in teacher education programs and staff development professionals.

mitosis versus meiosis worksheet: Human Genetics, Informational and Educational Materials, 1979 Printed and audiovisual educational and informational materials dealing with human genetics and genetic diseases. Intended for interested laypersons and professionals. Arranged by titles according to format of books, journal articles, videocassettes, film loops, slide/tape lectures, slide sets, posters and charts, motion pictures, laboratory/teaching kits, games, filmstrips, and audiocassettes. Subject heading index. List of publishers, organizations, and producers.

mitosis versus meiosis worksheet: Physiology Coloring Workbook Kenneth Axen, Kathleen Vermitsky Axen, 1997 Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking, original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively, through coloring, thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained, and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue, and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy and rehabilitation, medical technology, nutrition, physical education, allied health and health sciences. The 250 plates in the book are organized in the following sections: Homeostasis The Cell Transport Mechanisms Nervous System Muscle Cardiovascular System Renal System Respiratory System Gastrointestinal System Metabolism Endocrine System Reproduction

mitosis versus meiosis worksheet: Anatomy and Physiology of Animals Mr. Rohit Manglik, 2024-06-13 EduGorilla Publication is a trusted name in the education sector, committed to empowering learners with high-quality study materials and resources. Specializing in competitive exams and academic support, EduGorilla provides comprehensive and well-structured content tailored to meet the needs of students across various streams and levels.

mitosis versus meiosis worksheet: *CK-12 Biology Teacher's Edition* CK-12 Foundation, 2012-04-11 CK-12 Biology Teacher's Edition complements the CK-12 Biology Student Edition FlexBook.

mitosis versus meiosis worksheet: **Holt Biology: Meiosis and sexual reproduction**, 2003

mitosis versus meiosis worksheet: *NEET Foundation Handbook of Cell Biology* Chandan Sengupta, This hand book is meant for students having a plan for preparing Pre Medical Board Examinations and also a plan for optng competitive examinations like NEET, BDS and other such entrance examinations. There will be sa series of such publications which are advanced for covering different content areas of the study. These are merely a reparatory study meant primarily for

equipping an individual for the forthcoming challenges. Contents are designed on the basis of the recommendations made by the Curriculum Framework Proposal of NCERT for Students aspiring for National Entrance Test meant for seeking admission in Under Graduate Medical Institutions. There are two such volumes for clearing the fundamental concepts of Science related doubts. This book has been published with all reasonable efforts taken to make the material error-free after the consent of the author. No part of this book shall be used, reproduced in any manner whatsoever without written permission from the author, except in the case of brief quotations embodied in critical articles and reviews. This workbook is meant for students having eagerness for improving in later course of study in the field of science and technology. It will also expose an individual to some higher challenges of studies.

mitosis versus meiosis worksheet: General Zoology Laboratory Manual Stephen A. Miller, 1994 This is an up-to-date zoology lab manual, which can be used with any general zoology text on the market.

mitosis versus meiosis worksheet: Educart ICSE Class 10 One-shot Question Bank 2026 Biology (strictly for 2025-26 boards) Sir Tarun Rupani, 2025-07-12 Complete Biology revision in one clear, concise, and exam-oriented book This One-shot Biology Question Bank by Sir Tarun Rupani is crafted to help ICSE Class 10 students revise the entire Biology syllabus with speed and accuracy. With concept clarity, labelled diagrams, and exam-style practice, the book follows the official 2025-26 ICSE syllabus strictly. Key Features: As per Latest ICSE 2025-26 Curriculum: Full coverage of chapters including Cell Cycle, Genetics, Human Anatomy, Photosynthesis, and more. One-shot Format: Every chapter starts with quick theory notes, key definitions, concept maps, and labelled diagrams for instant recall. All ICSE Question Types Included: Objective, short/long answer, diagram-based, reasoning, and case-based questions. Chapterwise PYQs Included: Previous year questions from ICSE board papers added for real exam insight. Solved in ICSE Answering Style: Structured, stepwise solutions with proper scientific terminology, diagram labelling, and formatting. Diagrams & Terminology Focus: Special emphasis on scoring topics like biological processes, labelled structures, and scientific terms. Why Choose This Book? This Biology One-shot by Sir Tarun Rupani is your complete toolkit for revision and practice built to strengthen concepts and boost answer presentation. A smart, reliable resource to prepare confidently and score high in the 2026 ICSE Biology board exam.

mitosis versus meiosis worksheet: Resources in Education, 1975

mitosis versus meiosis worksheet: NEET Foundation Cell - The Unit of Life Chandan Sengupta, This workbook is suitable for students having eagerness to improve the skill and competence for making oneself fit for the examinations and other challenges, such as any University or College Entrance Examinations. Strategy of utilizing information is more important than compared to remembering information. One should not go for any elaborated option before any examination. Such a kind of effort rarely brings fruitful results. Designing effective strategy of content management and implementing the same in time is most important. This book has been published with all reasonable efforts taken to make the material error-free after taking needful consent of the author. No part of this book shall be used, reproduced in any manner whatsoever without written permission from the author, except in the case of brief quotations embodied in critical articles and reviews. The subject area namely Cell Biology and Genetics has a vast scope of discussions on the basis of various types of inventions duly incorporated in the regular study time to time. All such incorporations are limited to the scope of various frameworks of curriculum prescribed by various streams of study like CBSE, ICSE and State Boards. Some of the integrated framework is incorporated in the content areas meant for competitive exams like pre medical entrance examinations, Graduate level Entrance Examinations etc. Topics incorporated in this book are on the basis of such integrations of various streams of studies. This book has been published with all reasonable efforts taken to make the material error-free after the consent of the author. No part of this book shall be used, reproduced in any manner whatsoever without written permission from the author, except in the case of brief quotations embodied in critical articles and reviews. The

field of study is restricted to discussions related to Cell Organelles, different types of cells, functional diversities of various parts of cells, combination and recombination mechanisms of genes, expression of genes through different cellular activities and some of the selected anomalies caused by genetic problems.

mitosis versus meiosis worksheet: Biology of Plants Henry L. Dean, Robert W. Schuhmacher, 1987

mitosis versus meiosis worksheet: Anatomy and Physiology Workbook For Dummies Janet Rae-Dupree, Pat DuPree, 2007-12-05 An excellent primer for learning the human body An anatomy and physiology course is required for medical and nursing students as well as for others pursuing careers in healthcare. Anatomy & Physiology Workbook For Dummies is the fun and easy way to get up to speed on anatomy and physiology facts and concepts. This hands-on workbook provides students with useful exercises to practice identifying specific muscle groups and their functions, memory exercises, as well as diagrams and actual demonstrations that readers can personally enact to illustrate the concepts.

mitosis versus meiosis worksheet: General Zoology Stephen A. Miller, 2001-05-25 Provides exercises and experiences that should help students: understand the general principles that unite animal biology; appreciate the diversity found in the animal kingdom and understand the evolutionary relationships; and become familiar with the structure of vertebrate organ systems

mitosis versus meiosis worksheet: Teacher's Wraparound Edition: Twe Biology Everyday Experience Albert Kaskel, 1994-04-19

mitosis versus meiosis worksheet: 40 Ways to Support Struggling Readers in Content Classrooms, Grades 6-12 Elaine K. McEwan, Elaine K. McEwan-Adkins, 2007-05 The book's major strengths are its ease of use and the range of approaches to address many different reading issues. You can read straight through for a host of ideas, or you can pinpoint exactly which kind of strategy to explore.--Kristie Mary Betts, English TeacherPeak to Peak High School, Lafayette, CO Bottom line: This book is reader friendly! Teachers in the content areas can quickly and easily find specific ideas to help students.--Barbara L. Townsend, Reading SpecialistElkhorn Area School District, WI Help for students who are overwhelmed, feel confused, can't remember, lack language skills, or just don't get it. In today's era of accountability, teachers are expected to help all secondary students understand complex concepts and ideas and demonstrate proficiency on high-stakes tests. To promote success for struggling readers in all content areas, expert educator Elaine K. McEwan offers 40 user-friendly and easy-to-implement strategies in an invaluable text that includes three tables of contents (traditional, topical, and problem-solving) formatted for quick and easy reference. Each of the 40 research-based and classroom-tested techniques features: An intriguing quotation or definition to grab your attention A brief description of the method and suggestions for implementation Recommended resources to gain a more in-depth understanding of the method Research citations to demonstrate the power of the method to get results Offering cross-references and advance organizers throughout, this book provides the specific yet comprehensive information you need to support all students with reading difficulties.

Meiosis vs. Mitosis: Unraveling Cell Division (Yahoo News Canada1y) In the beginning, you were just some genetic material. In order to make you, your biological mom and dad both had to participate in an effort to pitch in one gamete each — a sperm cell and an egg cell

Meiosis vs. Mitosis: Unraveling Cell Division (Yahoo News Canada1y) In the beginning, you were just some genetic material. In order to make you, your biological mom and dad both had to participate in an effort to pitch in one gamete each — a sperm cell and an egg cell

Mitosis vs Meiosis (News Medical2y) Mitosis and meiosis are both processes by which cells reproduce, but there are distinct differences between the two. While new cells are generated during mitosis, meiosis is a special type of cell

Mitosis vs Meiosis (News Medical2y) Mitosis and meiosis are both processes by which cells reproduce, but there are distinct differences between the two. While new cells are generated during mitosis, meiosis is a special type of cell

Replication and Distribution of DNA during Meiosis (Nature13y) Like mitosis, meiosis is a form of eukaryotic cell division. However, these two processes distribute genetic material among the resulting daughter cells in very different ways. Mitosis creates two

Replication and Distribution of DNA during Meiosis (Nature13y) Like mitosis, meiosis is a form of eukaryotic cell division. However, these two processes distribute genetic material among the resulting daughter cells in very different ways. Mitosis creates two

How Cells Divide: Mitosis vs. Meiosis (PBS10y) As viewed from a human perspective, nature has done some ingenious engineering to overcome some of the obstacles it has faced. Take the evolution of sex, for instance. To make the move from asexual to
