

political science conferences 2023

Political Science Conferences 2023: A Gateway to Global Insights and Networking

political science conferences 2023 have become pivotal events for scholars, practitioners, and students alike who are passionate about understanding the complexities of governance, international relations, public policy, and political theory. These gatherings are not just about sharing research papers; they offer dynamic platforms where ideas are debated, collaborations are forged, and the future of political science is shaped. As the world continues to face political upheavals, shifting alliances, and evolving governance models, attending these conferences can provide invaluable perspectives and fresh analytical tools.

In this article, we'll explore some of the most notable political science conferences taking place in 2023, what attendees can expect, and how these events contribute to advancing the discipline globally.

Why Attend Political Science Conferences 2023?

Attending political science conferences in 2023 offers numerous benefits beyond the obvious opportunity to present your research or learn about cutting-edge studies. These events are melting pots of diverse political thought and practice, often featuring academics, policymakers, diplomats, and activists.

Networking Opportunities

One of the greatest advantages of political science conferences is the ability to connect with peers from around the world. Whether you are an early-career researcher or a seasoned political scientist, networking can lead to collaborative research projects, job opportunities, or invitations to contribute to influential journals.

Exposure to Emerging Trends

Political science is a rapidly evolving field that intersects with technology, economics, and sociology. Conferences in 2023 highlight new methodologies such as data analytics in electoral studies, the impact of social media on political mobilization, and the role of artificial intelligence in policy formulation. Engaging with these topics helps attendees stay ahead in their research and teaching.

Top Political Science Conferences to Watch in 2023

Each year, various international and regional conferences draw significant attention in the political science community. Here are some key events that stand out in 2023.

American Political Science Association (APSA) Annual Meeting

The APSA Annual Meeting is one of the largest gatherings for political scientists worldwide. In 2023, the conference is scheduled to be held in Los Angeles, featuring hundreds of panels, roundtables, and poster sessions. Topics range from comparative politics to political theory, with a special focus on democracy and governance in the digital age.

International Studies Association (ISA) Conference

ISA's 2023 conference promises a vibrant platform for those interested in international relations and global security. This year's theme centers on "Power and Purpose in a Fragmented World," reflecting contemporary geopolitical challenges such as rising nationalism, climate diplomacy, and cyber warfare.

European Consortium for Political Research (ECPR) General Conference

Held every two years, the ECPR conference is a major event for European political scientists. The 2023 edition in Prague is expected to bring together scholars to discuss pressing issues like EU integration, populism, and human rights. The interdisciplinary nature of the conference encourages dialogue between political science and other social sciences.

Preparing for Political Science Conferences 2023: Tips for Success

Whether you are presenting a paper or attending as a participant, preparation can significantly enhance your conference experience.

Selecting the Right Sessions

With dozens of panels running simultaneously, it's wise to plan ahead. Review the conference program in advance and prioritize sessions that align with your research interests. Also, consider attending keynote addresses and workshops that may introduce new methodologies or theoretical frameworks.

Engaging Actively

Don't hesitate to ask questions during sessions or engage speakers afterward. Conferences are

interactive spaces, and meaningful discussions can lead to deeper understanding and future collaborations.

Utilizing Social Media and Conference Apps

Many 2023 political science conferences provide dedicated apps or social media hashtags to facilitate networking and information sharing. Using these tools can help you connect with other attendees, stay updated on last-minute changes, and even participate in virtual events.

The Role of Virtual and Hybrid Formats in 2023

The COVID-19 pandemic accelerated the adoption of virtual conferencing, and political science conferences in 2023 continue to embrace hybrid formats. This shift has democratized access, allowing scholars from low-resource settings or those unable to travel to participate meaningfully.

Virtual attendance also offers flexibility, but it can sometimes limit spontaneous networking. Many conferences are experimenting with innovative digital platforms to recreate informal interactions, such as virtual coffee breaks and breakout rooms.

Emerging Themes and Hot Topics at Political Science Conferences 2023

The political landscape is always shifting, and the themes discussed at political science conferences reflect these changes.

Democracy and Authoritarianism

With democratic backsliding reported in several countries, sessions often focus on the resilience of democratic institutions, the role of civil society, and the mechanisms authoritarian regimes use to maintain control.

Climate Politics and Environmental Policy

As climate change increasingly dominates global agendas, political scientists are analyzing policy responses, international negotiations, and the politics of environmental justice.

Technology and Politics

From misinformation campaigns to digital surveillance, the intersection of technology and politics is a hot topic. Political science conferences in 2023 are exploring how tech shapes voter behavior, policy-making, and global security.

How Political Science Conferences 2023 Foster Global Collaboration

One of the most exciting aspects of these conferences is their international character. Attendees often come from diverse cultural and political backgrounds, which enriches discussions and broadens perspectives.

Collaborative projects born at conferences can lead to comparative studies that deepen our understanding of political phenomena across different contexts. Moreover, these forums often encourage mentorship and inclusion of underrepresented voices, contributing to a more equitable academic community.

Whether you're a graduate student looking to present your first paper or an established expert aiming to stay connected with the latest debates, political science conferences in 2023 offer a valuable space for intellectual growth and professional development. Embracing these opportunities can open doors to new ideas, partnerships, and insights that resonate long after the event concludes.

Frequently Asked Questions

What were some of the major political science conferences held in 2023?

Major political science conferences in 2023 included the American Political Science Association (APSA) Annual Meeting, the International Studies Association (ISA) Conference, and the European Consortium for Political Research (ECPR) General Conference.

How did political science conferences in 2023 adapt to post-pandemic conditions?

In 2023, many political science conferences adopted hybrid formats, combining in-person and virtual participation to increase accessibility and accommodate ongoing health concerns.

What were the key themes discussed at political science conferences in 2023?

Key themes included the impact of digital misinformation on democracy, climate change policy, authoritarianism and democracy resilience, global security challenges, and the role of social movements.

Which regions hosted the most influential political science conferences in 2023?

North America and Europe hosted several influential political science conferences in 2023, with notable events also taking place in Asia and Australia to foster global academic exchange.

How can students benefit from attending political science conferences in 2023?

Students gained networking opportunities, exposure to cutting-edge research, chances to present their own work, and access to career development workshops at political science conferences in 2023.

Were there any notable keynote speakers at political science conferences in 2023?

Yes, prominent scholars and practitioners such as Francis Fukuyama, Anne-Marie Slaughter, and Yascha Mounk delivered keynote addresses at various political science conferences in 2023.

What role did technology play in political science conferences in 2023?

Technology facilitated virtual attendance, live streaming, interactive Q&A sessions, and digital poster presentations, enhancing participation and engagement during 2023 political science conferences.

How can researchers submit their work to political science conferences in 2023?

Researchers typically submitted abstracts or full papers through the official conference websites before specified deadlines, following guidelines outlined by the organizing committees in 2023.

Additional Resources

Political Science Conferences 2023: A Global Overview of Emerging Trends and Scholarly Exchange

political science conferences 2023 have marked a pivotal year for the discipline, offering scholars, policymakers, and practitioners a platform to dissect contemporary political challenges and theoretical advancements. As global political landscapes evolve rapidly, these conferences have become important arenas for intellectual exchange, networking, and fostering interdisciplinary research. This article delves into the most significant political science conferences held in 2023, highlighting emerging themes, organizational formats, and the overall impact on the scholarly community.

Key Political Science Conferences in 2023: Scope and Significance

The year 2023 saw a resurgence of in-person political science conferences, complemented by hybrid and virtual formats that expanded accessibility for global participants. Major events organized by leading associations such as the American Political Science Association (APSA), the European Consortium for Political Research (ECPR), and various regional bodies demonstrated a robust agenda focused on democracy, governance, conflict resolution, and emerging technologies in politics.

One notable trend in political science conferences 2023 was the increased emphasis on interdisciplinary approaches. Conferences integrated perspectives from economics, sociology, data science, and environmental studies, reflecting an acknowledgment of politics as inherently interconnected with other social phenomena. This interdisciplinary focus enriched discussions and broadened the appeal of these events.

American Political Science Association (APSA) Annual Meeting

The APSA Annual Meeting remains the flagship event in the field, attracting thousands of political scientists worldwide. The 2023 edition, held in Chicago, featured over 1,500 panels and roundtables, addressing critical issues such as the erosion of democratic norms, the rise of authoritarianism, and the impact of misinformation on electoral processes.

Innovations in conference design included thematic clusters on machine learning applications in political analysis and workshops on ethical considerations in political data usage. The inclusion of early-career researcher sessions facilitated mentorship and career development, underscoring APSA's commitment to nurturing the next generation of political scientists.

European Consortium for Political Research (ECPR) General Conference

The ECPR's 2023 General Conference, convened in Prague, focused extensively on European political integration, populism, and migration policy. The event attracted a diverse cohort of scholars, policymakers, and civil society representatives, fostering dialogue on pressing continental challenges.

A distinctive feature of the ECPR conference was its emphasis on comparative politics and methodological innovations. Panels explored advanced statistical techniques and qualitative methods, enabling participants to critically evaluate research designs and empirical findings. The conference also incorporated several public engagement sessions, enhancing the societal relevance of political science scholarship.

Emerging Themes and Methodologies in Political Science Conferences 2023

Political science conferences in 2023 increasingly prioritized emerging themes that reflect the complexities of modern governance and global interdependence. Key topics included democratic resilience, authoritarian resilience, climate politics, and the digital transformation of political communication.

Democratic Backsliding and Authoritarian Resilience

One of the most extensively debated themes was democratic backsliding. Scholars presented empirical studies tracking democratic erosion across various regions, analyzing institutional weaknesses and the role of political actors in undermining democratic norms. Conversely, research on authoritarian resilience examined how autocratic regimes adapt to internal and external pressures, utilizing technological surveillance and propaganda techniques.

These discussions were particularly relevant given the geopolitical turbulence witnessed in 2023, including contested elections and civil unrest. Political science conferences provided a venue for synthesizing these developments and proposing theoretical frameworks to understand the dynamics of regime change.

Climate Change and Political Response

With climate crises intensifying, political science conferences prominently featured sessions on environmental governance and the political dimensions of climate change. Scholars examined policy responses at local, national, and international levels, highlighting challenges related to policy coherence, stakeholder engagement, and social justice.

Interdisciplinary panels brought together political scientists, environmentalists, and economists to debate the efficacy of global climate accords and the political feasibility of green transitions. This thematic inclusion underscored the expanding purview of political science conferences 2023 into areas traditionally dominated by natural sciences.

Digital Politics and Information Ecosystems

The digital transformation of political communication emerged as a critical area of inquiry. Conferences addressed the influence of social media algorithms, misinformation campaigns, and digital activism on electoral outcomes and public opinion formation.

Workshops on computational methods and big data analytics showcased how political scientists are integrating cutting-edge tools to study online behavior patterns. Ethical discussions also surfaced, focusing on data privacy and the potential biases embedded in algorithmic decision-making.

Format Innovations and Accessibility Enhancements

The hybridization of political science conferences in 2023 enhanced inclusivity by accommodating participants unable to travel due to health, financial, or geopolitical constraints. Virtual platforms incorporated interactive features such as live Q&A, breakout rooms, and networking lounges, replicating many aspects of in-person engagement.

However, challenges remained in fostering spontaneous interactions and informal networking opportunities that are often critical for academic collaboration. Organizers experimented with novel formats such as “conference cafes” and virtual poster sessions to mitigate these limitations.

Moreover, many conferences increased efforts to ensure diversity and representation by implementing codes of conduct, offering travel grants for scholars from underrepresented regions, and spotlighting marginalized voices within the discipline. These initiatives contributed to a more equitable scholarly environment.

Comparative Analysis: Regional Variations in Political Science Conferences

While global conferences dominated the calendar, regional and thematic conferences provided unique insights into localized political phenomena. For example, the Latin American Studies Association (LASA) conference in 2023 concentrated on issues like democratization in the region, indigenous rights, and economic inequality.

Similarly, the African Association of Political Science hosted events addressing governance challenges specific to the continent, including post-conflict reconstruction and resource management. These regional gatherings often combined academic rigor with policy-oriented discussions, bridging the gap between theory and practice.

In contrast, conferences in Asia frequently emphasized authoritarian governance models, economic development, and the role of technology in statecraft, reflecting region-specific political dynamics. The diversity of conference agendas across regions enriched the global discourse and enabled cross-fertilization of ideas.

Benefits and Limitations of Political Science Conferences 2023

- **Benefits:** Facilitated knowledge exchange, promoted networking, supported early-career researchers, and encouraged interdisciplinary collaboration.
- **Limitations:** Accessibility challenges despite hybrid formats, time zone differences affecting participation, and occasional digital fatigue among virtual attendees.

Despite these challenges, political science conferences 2023 demonstrated resilience and adaptability, underscoring their continuing importance in advancing the discipline.

As the global political environment grows increasingly complex, the role of these conferences in shaping scholarly debates and informing policy remains vital. The knowledge generated and connections forged during these events will likely influence political science research trajectories and practice in the years to come.

political science conferences 2023: *Proceedings of the 2024 5th International Conference on Management Science and Engineering Management (ICMSEM 2024)* Valentin Vasilev, Cătălin Popescu, Yanhong Guo, Xiaolin Li, 2024-11-22 This book is open access. About ICMSEM 2024 2024 5th International Conference on Management Science and Engineering Management Management science and engineering management is a multidisciplinary field, focusing on the application of mathematical models, statistical analysis, information technology and system engineering principles to solve complex management problems and improve the quality, efficiency and effectiveness of organizational decision-making. It aims to optimize the allocation of enterprise resources, enhance operational efficiency, promote technological innovation and improve strategic planning through scientific analysis and application of engineering technology. This field involves a wide range of research topics, including but not limited to operations management, supply chain management, project management, quality management, risk management, information system management, technological innovation and R & D management. Therefore, for scholars, researchers and industry practitioners involved in this field, it is of great significance to explore the latest progress, challenges and future trends of management science and engineering management to promote the development of disciplines and solve practical problems.

political science conferences 2023: Social Discourse in Challenging Times - The International Interdisciplinary Scientific Conference 2023 - Proceedings and Book of Abstracts Anetta Čaplánová , Lubomír Darmo, 2023-07-15 In the light of current digital advancements, the discourse surrounding digitalization has increased in importance, and the International Scientific Conference "Social Discourse in Challenging Times" reflected upon this trend. Coordinated by the University of Economics in Bratislava, this event was organized within the ODDEA project, at the University of Economics in Bratislava, between May 17th-20th, 2023. A significant attribute of the conference was its hybrid form, utilizing both face-to-face interaction at the University premises, and MS TEAMS for virtual involvement. This conference focused on the exploration of two fundamental areas of study. The first explored interdisciplinary topics of the current discourse, while the second dived into the digital transformation occurring within the EU and Southeast Asian countries. The second area was specifically devoted to presentations of research findings from the first work package of the ODDEA project. This not only brought to the forefront the work of the project's researchers, but it also fostered synergies within the consortium, enhancing the project's implementation. The value and impact of the ODDEA project are also reflected within this volume. From discussions around current discourses to the exploration of the digitalization pathways, this collection represents a milestone in

our journey towards a digital society research that would be both inclusive and resilient. These presentations provide insights into the selected problems of digital transformation and are invaluable contributions to the understanding of digitalization during these challenging times. Our sincere appreciation goes out to the researchers, contributors, reviewers and the academic community who have made this significant contribution possible. We hope that this volume will fuel further discussions, inspire additional research, and drive innovative breakthroughs in digitalization and interdisciplinary studies.

political science conferences 2023: XV International Scientific Conference

"INTERAGROMASH 2022" Alexey Beskopylny, Mark Shamtsyan, Viktor Artiukh, 2023-02-24 The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022, Rostov-on-Don, Russia. This conference is dedicated to the innovations in the field of precision agriculture, robotics and machines, as well as agriculture biotechnologies and soil management. It is a collection of original and fundamental research in such areas as follows: unmanned aerial systems, satellite-based applications, proximal and remote sensing of soil and crop, positioning systems, geostatistics, mapping and spatial data analysis, robotics, and automation. Potential and prospects for the use of hydrogen in agriculture, for example, in high-performance tractors with hybrid electric transmission, are disclosed in the research works of scientists from all over the world. It also includes such topics as precision horticulture, precision crop protection, differential harvest, precision livestock farming, controlling environment in animal husbandry, and other topics. One of the important issues raised in the book is to ensure the autonomy of local farms. The topic of the impact of the agro-industrial sector on the environment also received wide coverage. Ways to reduce the burden on the environment are proposed, and the use of alternative fuels and fertilizers is suggested. The research results presented in this book cover the experience and the latest studies on the sustainable functioning of agribusiness in several climatic zones. The tundra and taiga, forest-steppe, the steppe and semi-desert—all this is a unique and incredibly demanded bank of information, the main value of which is the real experience of the functioning of agribusiness in difficult climatic and geographic conditions. These materials are of interest for professionals and practitioners, for researchers, scholars, and producers. They are used in the educational process at specific agricultural universities or during vocational training at enterprises and also become an indispensable helper to farm managers in making the best agronomic decisions.

political science conferences 2023: *Proceedings of the 2024 3rd International Conference on Educational Science and Social Culture (ESSC 2024)* Yongjun Feng, Wei Cui, Ye Dong, Guiyun Guan, 2025-05-04 This is an open access book. 2024 3rd International Conference on Educational Science and Social Culture (ESSC 2024) is scheduled to be held in Chengdu, China, during December 27-29, 2024. The 3rd International Conference on Educational Science and Social Culture (ESSC 2024) aims to unite scholars, educators, and practitioners to foster a deeper understanding of educational sciences and social culture. The conference will address emerging trends, innovative practices, and critical issues affecting education and society in today's complex global environment. ESSC 2024 focuses on promoting interdisciplinary research and collaborative efforts to explore and solve contemporary challenges in education and social culture. The conference serves as a platform for disseminating cutting-edge research, sharing practical solutions, and fostering dialogues that can translate into actionable policies and strategies. ESSC 2024 will feature extended workshops, keynote speeches from globally renowned experts, and enhanced networking opportunities. Unlike previous editions, this year's conference will incorporate more interactive sessions and digital platforms, providing a more engaging and inclusive experience for both in-person and remote participants.

political science conferences 2023: **Proceedings of the 2024 3rd International Conference on Comprehensive Art and Cultural Communication (CACC 2024)** Bootheina Majoul, Abhisarika Prajapati, Sharifah Faizah Syed Mohammed, Mohd Farid Mohd Sharif, 2024-09-14 This is an open access book. Integrated art, also known as composite art, is an art classification that refers to the art formed by the synthesis of several art forms, such as songs

combining poetry and music, architecture combining painting and sculpture, drama combining literature, performance, music, dance, art, etc. Cultural dissemination, also known as cultural diffusion, refers to the interactive phenomenon of cultural transmission from one society to another, from one region to another, and from one group to another. 2024 3rd International Conference on Comprehensive Art and Cultural Communication (CACC 2024) will be held from June 28 to 30, 2024 in Kuala Lumpur, Malaysia. This conference will focus on the emerging research field of Integrated Art and Cultural Communication, providing an international platform for experts, professors, scholars, engineers, and others from domestic and foreign universities, scientific research institutes, enterprises and institutions to share professional experience, expand professional networks, exchange new ideas face-to-face, and showcase research results. It will explore the key challenges and research directions faced by the development of this field, In order to promote the development and application of theories and technologies in this field in universities and enterprises, as well as establish business or research connections for participants and seek global partners in future careers.

political science conferences 2023: Proceedings of the 9th International Conference on Indonesian Social and Political Enquiries (ICISPE 2024) Bangkit A. Wiryawan, Muhammad Faiq Adi Pratomo, Suyatno Ladiqi, 2025-08-01 This is an open access book. The International Conference on Indonesian Social and Political Enquiries(ICISPE)is an annual eventheld by the Faculty of Social and Political Sciences at Universitas Diponegoro.This year's ICISPE isheld for the 9th time.As with the previous years,this international conference is built based on thespirit and passion of the developmenfrommuti-discipline and inusive sciences,whilst promoingthe advancement of research across the country.Thus,the conference not only gives a chance for the academics to assess phenomenon and contemporary problems by collaborating with variousdisciplines,but also delivers opportunities as widely as possible to every stakeholder who is willingto bridge academic and practical fields. ICSPE also offers to facilitate open discusslons and debates,transfer of knowledge,strategies forpolicy formulation.and networking amongst scholars and policymakers.Later,this multi-disciplineand inclusive collaboration are further implemented through discussion forums,advanced research, and or joint-publication. The theme of this year's ICISPE conference is Navigating challenges and limits to inclusive development in the Global South.The post-covid world has shown some economic and political turmoil that posed a potential threat to reaching the 2030 goal. One of which is the rising of hybrid regimes at the cost of democratic growth in many developing countries.According to the latest V Dem Report(Marina et aL,2024).more than 40 countries are in the state of autocratizing with deteriorating freedom of expression in 35 countries that are mostly in the Global South This could signify a great challenge in realizing the 2030 Agenda on inclusive and sustainable development.

political science conferences 2023: *Proceedings of the International conference of Economics Business and Economics Education Science (ICE-BEES-24)* Kris Brantas Abiprayu, Avi Budi Setiawan, 2024-10-02 This is an open access book. ICE-BEES 2024 is a refereed conference organized by Universitas Negeri Semarang, Indonesia in collaboration with University Teknologi MARA, Malaysia and Diponegoro University, Indonesia. The conference will be held from 12th to 13st June 2024 at Oak Tree Hotel, in Semarang City, Central Java Province, Indonesia.

political science conferences 2023: The Science and Art of Simulation Michael M. Resch, Nico Formánek, Ammu Joshy, Andreas Kaminski, 2024-12-18 Trust is a central pillar of the scientific enterprise. Much work in the philosophy of science can be seen as coping with the problem of establishing trust in a certain theory, a certain model, or even science as a whole. However, trust in science is threatened by various developments. With the advent of more complex models and the increasing usage of computer methods such as machine learning and computer simulation, it seems increasingly challenging to establish trust in science. How and on what basis can an appropriate trust in science be built? We are interested in how trust is established in such cases of increasing complexity (of models and communication) and what could be appropriate measures to alleviate doubt.

political science conferences 2023: *The Routledge Handbook of Political Risk* Cecilia Emma Sottilotto, Julian Campisi, Johannes Leitner, Hannes Meissner, 2025-03-24 The Routledge Handbook of Political Risk explores the context, analysis, and management of political risk arising from recent tectonic geopolitical challenges to the world order posed by pandemics, nationalist policy interventions, changing supply chains, technological transformation, and the climate crisis. Seasoned and emerging academics from the Global North and South, alongside risk practitioners and business professionals from multiple continents and industries, reconsider and address policy-oriented questions in relation to social, political, democratic, environmental, economic, security, technological, and geopolitical challenges. Across five distinctive parts, this Handbook considers ethical risks, populism, weaponised interdependence, protectionism, the disruptive effects of AI, company case studies, industries, and political risk management, while also reconsidering the future of political risk. The volume will appeal to scholars and students of international business and management studies, political science, area studies, security studies, geography, history, and sociology. In the absence of functioning global governance to mitigate such risks, it will also be of great use to a range of consultants, investors, business practitioners, and corporations.

political science conferences 2023: Proceedings of the 3rd International Conference on Christian and Inter-Religious Studies (ICC-IRS 2024) Desi Natalia, Maria Veronica, Deri Susanto, 2025-07-16 This is an open access book. Third International Conference on Christian and Inter-Religious Studies (ICC-IRS) 2024 will be held in Palangka Raya from June 20-22, 2024. This prestigious event is organized by the Institut Agama Kristen Negeri (IAKN) Palangka Raya as part of an ongoing effort to facilitate academic discussions on critical issues in the digital era. With the theme "Religion, Education, and Culture in the Digital Age," this conference will serve as a forum for scholars, researchers, and practitioners from various backgrounds to discuss and share insights in the fields of religion and education. The topics to be covered include a wide range of disciplines, including Education, Theology, Psychology and Counseling, Sociology and Philosophy of Religion, Religious Moderation, as well as Music and Arts. To enrich the discussions, the conference will feature distinguished academics from both domestic and international institutions as keynote speakers. With great enthusiasm, the committee has received over 200 participants from various institutions, and of these, approximately 125 manuscripts have been approved for presentation. From these presentations, around 75 full papers will be selected for publication. It is hoped that this conference will not only contribute significantly to the advancement of knowledge in the field of religion but also strengthen academic networks among the participants, fostering further collaboration in the future.

political science conferences 2023: **Proceedings of the 12th Gadjah Mada International Conference on Economics and Business (GAMAICEB 2024)** Widya Paramita, Muhammad Ryan Sanjaya, Nurul Indarti, Fu'ad Rakhman, Leo Indra Wardhana, 2025-05-01 This is an open access book. The 12th Gadjah Mada International Conference on Economics and Business (GAMAICEB) is an annual international conference organized by the Publication Unit, Faculty of Economics and Business, Universitas Gadjah Mada. This conference aims to provide a medium for participants to disseminate their research ideas and results and develop their networks. Through the participants' contribution, it is hoped that this conference could provide a deeper understanding of current economics and business issues.

political science conferences 2023: Proceedings of the International Conference on Business, Economics, Social Sciences, and Humanities - Humanities and Social Sciences Track (ICOBEST-HSS 2024) Lia Warlina, Senny Luckyardi, 2024-07-22 This is an Open Access Book. The International Conference on Business, Economics, Social Sciences, and Humanities (ICOBEST) is hosted annually by Universitas Komputer Indonesia (UNIKOM). ICOBEST aims to facilitate the exchange of knowledge and experiences among academia, researchers, and scholars, fostering optimism and revitalization within the scientific framework. ICOBEST provides a unique opportunity for participants to network, share ideas, and present their research findings to an international audience. Encouraging discussions on the latest innovations, emerging trends, and practical

challenges in business, economics, social sciences, and humanities. This year, UNIKOM will held the conference in hybrid format, which means interested authors can participate in this conference either in-person or through online means.

political science conferences 2023: Political Debasement Ofer Feldman, 2023-04-26 This edited book is an innovative collection of studies—pioneering scholarship systematically exploring the various features of debasement language used by political leaders in their speeches, statements, and remarks during parliamentary and other official as well as unofficial, private activities. The book examines in particular the forms, functions, and effects of political debasement in Western and non-Western countries, including Spain, Malaysia, the UK, Japan, China, India, Montenegro, Greece, Poland, and Israel. It addresses the growing interest in recent years in issues related to the increase of debasement in the public sphere. These include high-echelon politicians' invective and vulgarity toward their colleagues in houses of parliament; their abusive and cynical language toward sections of the public, including women and minorities; and their crude sarcasm and irony expressed toward media representatives. The book focuses on those instances where political leaders at the very highest-level employ debasement discourse; it identifies the specific language they use in different political cultures and under different situations; the reasons for using this type of language; and its consequences. The book brings together a team of distinguished political scientists, communication and linguistics researchers, and social and political psychologists, with expert backgrounds and experience in understanding the reciprocal interaction between language and politics, in this case: debasement. They discuss and provide a number of novel insights of theoretical and practical importance regarding debasing discourse, as well as potential avenues for future research on the nature and effect of this type of language.

political science conferences 2023: The Oxford Handbook of Comparative Environmental Politics Jeannie Lynn Sowers, Stacy D. VanDeveer, Erika Weinthal, 2023 Including 42 chapters, organized across 9 sections, The Oxford Handbook of Comparative Environmental Politics explores some of the most important environmental issues through the lens of comparative politics, including energy, climate change, food, health, urbanization, waste, and sustainability. The chapters delve into more traditional forms of comparative environmental politics (CEP)--the political economy of natural resources and the role of corporations and supply chains--while also showcasing new trends in CEP scholarship, particularly the comparative study of environmental injustice and intersectional inequities. The Handbook highlights scholarship from a broader range of regions and includes approaches from political science, anthropology, sociology, geography, gender theory, law, human rights, and development studies.

political science conferences 2023: Proceedings of the International Conference on Cultural Policy and Sustainable Development (ICPSD 2024) Abdul Kadir Jaelani, Irwansyah Irwansyah, Fokke Fernhout, Adolfo Antonio Paolini, Mohd Rizal Palil, Hilaire Tegan, Okid Parama Astirin, Sutarno Sutarno, Patricia Covarrubia, Bobur Sobirov, Robbi Rahim, 2024-12-23 This is an open access book. Cultural policy plays a crucial role in shaping societies, influencing cultural expressions, and advancing sustainable development. Laws and regulations related to culture, both at the national and international levels, play a key role in regulating and protecting cultural heritage and supporting a healthy cultural ecosystem. The First International Conference on Cultural Policy and Sustainable Development (ICPSD) aims to explore the impact of cultural policies in democratic and nondemocratic regimes. This conference will serve as a platform for scholars, policymakers, and practitioners to exchange ideas, share experiences, and discuss strategies to promote cultural diversity, creativity, and sustainability in different political contexts. Internationally, various agreements such as the UNESCO Convention on the Protection and Promotion of the Diversity of Cultural Expressions underscore the importance of cultural policies in supporting sustainable development and promoting cultural diversity (UNESCO Convention 2005, n.d.). At the national level, laws such as the Cultural Law in Indonesia establish a framework for the protection and development of culture, as well as provide a legal basis for inclusive and sustainable cultural policy-making (Law Number 5 of 2017 concerning the Advancement of Culture, n.d.). In democratic

regimes, cultural policies are often developed through participatory processes, reflecting the values and aspirations of diverse communities. These policies aim to support cultural expression, protect cultural heritage, and promote cultural rights, thereby contributing to social cohesion and inclusive development. However, challenges such as funding limitations, cultural commodification, and the impact of digital technology require ongoing dialogue and innovation in policy approaches. On the other hand, cultural policies in nondemocratic regimes are often used as tools for political control, censorship, and the promotion of state ideology. Nevertheless, cultural practitioners and activists in these contexts demonstrate resilience and creativity in navigating restrictive environments, often using digital technology to amplify their voices and preserve cultural identity. In various countries, existing legislation greatly influences the implementation of cultural policies and sustainable development. In Indonesia, for example, Law Number 5 of 2017 concerning Culture serves as the main foundation for the development of sustainable cultural policies. This law promotes the protection, preservation, development, utilization, and fostering of culture as an integral part of national development (Law Number 5 of 2017 concerning the Advancement of Culture, n.d.). Cultural Policy and Sustainable Development are interrelated concepts and are the main focus of this conference, where appropriate cultural policies can strengthen sustainable development, reinforce cultural identity, and improve the quality of life for communities. In the context of the conference theme, Cultural Policies in Democratic and Nondemocratic Regimes, it is important to consider the differences in cultural policy approaches between these two types of regimes. This forum aims to facilitate communication among Law Faculty Academics worldwide with the agenda of the 1st International Conference on Cultural Policy and Sustainable Development (ICPSD): "Cultural Policies in Democratic and Nondemocratic Regimes".

political science conferences 2023: Beyond Europe: Central Asia, the Middle East and Global Economy Tadeusz Wallas, Sang-Chul Park,, Radoslaw Fiedler, Przemyslaw Osiewicz, 2021-01-25 Beyond Europe: Central Asia, the Middle East and Global Economy is an interesting look at the role of Central Asia and the Middle East in the global and Eurasian economy. Authors of this volume highlight the most important conditions of global and regional cooperation and political and economic competition. The volume provides a broad and critical analysis of regional geoeconomic trends. It underscores the most important conditions of global and regional cooperation and political and economic rivalry, as well as the position of regions in the economic and foreign policy of global and regional powers. The wide selection of examples means that the reader receives a large dose of knowledge about the political and economic realities of these regions, the ongoing processes, and the specifics of the rivalry.

political science conferences 2023: Women in Eastern European Post-Socialist Countries Agnieszka Kasińska-Metryka, Karolina Pałka-Suchojad, 2024-07-31 Women in Eastern European Post-Socialist Countries: Social, Scientific, and Political Lives explores the role of women in Central and Eastern Europe in bringing about social change, and the obstacles they face in fighting for equality in various areas of life such as science, politics, and reproductive rights. Against a backdrop of increasing re-traditionalisation of post-socialist societies, and the reinvigoration of patriarchal attitudes, the book presents a timely and important collection. Through chapters authored by academics with different specialities across the social sciences, the book addresses the fundamental areas in which women's determination is already initiating changes, namely politics and diplomacy, science, reproductive rights, and customs resulting from religion. Women in Eastern European Post-Socialist Countries is of interest to scholars of gender studies, political and social sciences, and contemporary central and eastern European history.

political science conferences 2023: On Xi Jinping Former Prime Minister Kevin Rudd, Kevin Rudd, 2024-10-15 In On Xi Jinping, former Australian Prime Minister Kevin Rudd provides an authoritative account of the worldview driving Chinese behavior on the world stage. Focusing on domestic policy, political economy, and foreign policy, Rudd argues that President Xi Jinping's worldview differs significantly from those of the leaders who preceded him and highlights how the shift has impacted policy. A powerful analysis of the worldview of arguably the most consequential

world leader of our era, this will be essential reading for anyone interested in how Xi is transforming both China and the international order.

political science conferences 2023: Young People Shaping Democratic Politics Ian Rivers, C. Laura Lovin, 2023-05-12 At a time when political mobilisation is a symptom of social dissatisfaction, young people's participation in political decision-making, practice and ideological change, make foregrounding and investigating their political practices a necessity. The title of this book, Young People Shaping Democratic Politics: Interrogating Inclusion, Mobilising Education clearly announces its intention, subject, and mission. This collection has been inspired by topical youth mobilisations that aim to address injustices and inequalities which are rooted in poverty, austerity, violence, increased surveillance, climate change, dislocation, xenophobia, the rise of authoritarian regimes, and a global turn to the political right. Whereas young people are politicised in moments of conflict and become symbolic conduits for the future of their nation, they represent a category most often relegated to the apolitical sphere before and after such moments of crisis. This edited collection seeks to expand our engagement with inclusion beyond educational institutions by situating young people at the centre of our inquiry, as agents of political processes that promote, problematise and re-imagine inclusive societies. The chapters engage in contemporary case-studies, which are mapped across a wide range of countries from Europe (Serbia, Spain and United Kingdom), North Africa (Egypt), South Africa, North America (United States), South-Asia (Bangladesh), and West Asia (Lebanon).
