- **Paul Bratter:** A more grounded and pragmatic attorney, Paul's monologues tend to highlight his cautious nature and occasional frustration with Corie's recklessness. His dialogue reveals the tension between his desire for stability and the unpredictability that Corie brings into his life.

It documents oppression across ethnic, racial, class, and sexual orientation groups in a wide range of gendered spaces, including the home, the workplace, unions, educational institutions, and the Internet. Exploring the way these different but related systems of oppression interact, the editors come to view sexism not as a static thing, but as part of a dialectic of domination in which women are simultaneously oppressed and capable of oppressing others through their discourse and practice. With its broad range of approaches, its focus on discourse and experience in gendered spaces, and its debunking of the personal and societal fictions of gender, this book goes a long way toward explaining why sexism is still so pervasive in everyday life.

It is an intentional effort to look both wider and deeper than the well-known canon of U.S. broadcast history that dominates popular memory of the relationship of television to American society. The Peabody Archive is especially suited to this project because it is an archive of programming produced and submitted not just by the big networks in New York or Los Angeles, but by stations and media producers across the nation and, more recently, around the world. This project asks, how might these programs change our understanding of television's past, and impact the ways we think about television's present and future? What new questions can we ask and what new approaches should we take as a result of seeing and experiencing this programming? The contributions in this volume offer a dramatic range of approaches for how scholars can productively engage the archive's media and physical holdings to examine and reconsider television history--
