Features and Usability of the Almanac

The government assistance almanac 2000 2001 government assistance almanac was designed with usability in mind, particularly considering the diverse audience it served. Its layout and content reflect a balance between depth and clarity.

Organizational Structure

The almanac is organized thematically and regionally, allowing readers to either look up programs by category (such as healthcare, housing, food assistance) or by state. This dual structure enhances accessibility and user-friendliness, particularly for professionals who need to cross-reference data quickly.

Eligibility and Application Guidance

Data Accuracy and Updates

Given the evolving nature of government programs, maintaining up-to-date information is challenging. These challenges highlight the ongoing need for dynamic, user-friendly government assistance information platforms.

government assistance almanac 2000 2001 government assistance almanac: Funding Public Colleges and Universities for Performance Joseph C. Burke, 2002-10-10 This is the first comprehensive study of performance funding of public colleges and universities, which directly ties some state allocations to institutional results on designated indicators. The book examines performance funding as a national phenomenon, identifying the champions and critics of the program, the arguments for and against its adoption, the most common performance measures used for funding, the characteristics that separate stable from unstable initiatives, and the inherent possibilities and problems. The authors include case studies of performance funding in Tennessee, Missouri, Florida, Ohio, and South Carolina, and explore the reasons why Arkansas, Colorado, Kentucky, and Minnesota first adopted and later abandoned their programs. They examine problems with performance funding, such as the reluctance of the academic community to agree on reasonable goals for undergraduate education or the failure to apply performance funding to the academic departments that are mostly responsible for institutional results on many of the performance indicators. The contributors conclude that although the future of performance funding remains cloudy, one aspect is becoming clear—taxpayers are unlikely to continue to accept the proposition that performance should count in all endeavors except state funding for higher education. Contributors include E. Grady Brogue, Joseph C. Burke, Juan C. Copa, Patrick Dallet, Terri Lessard, Gary Moden, Dr. Robert B. Stein, Michael Williford, and David J. Wright.

government assistance almanac 2000 2001 government assistance almanac: The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2004-07-06 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice. However, the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics, political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume, Adam Ferguson and Adam Smith contributed to all these fields, and more. However, as intellectual specialization gradually replaced broad-based scholarship from the nineteenth century onwards, it became increasingly rare to find a scholar making major contributions to more than one. Once Alfred Marshall defined economics in neoclassical terms, as a narrow positive discipline, the link between economics, political science and moral philosophy was all but severed and economists redefined their role into that of 'the humble dentist' providing technical economic information as inputs to improve the performance of impartial, benevolent and omniscient governments in their attempts to promote the public interest. This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War.
