From coronavirus lockdowns to critical race theory in the classroom, it has become crystal clear that America's schools aren't working for America's students and parents. No one knows this better than Betsy DeVos. Long before she was tapped by President Trump to serve as secretary of education, DeVos established herself as one of the country's most influential advocates for education reform, from school choice and charter schools to protecting free speech on campus. She's unflinching in standing up to the powerful interests who control and benefit from the status quo in education – which is why the unions, the media, and the radical left made her public enemy number one. Now, DeVos is ready to tell her side of the story after years of being vilified by the radical left for championing common-sense, conservative reforms in America's schools. In Hostages No More, DeVos unleashes her candid thoughts about working in the Trump administration, recounts her battles over the decades to put students first, hits back at "woke" curricula in our schools, and details the reforms America must pursue to fix its long and badly broken education system. And she has stories to tell: DeVos offers blunt insights on the people and politics that stand

in the way of fixing our schools. For students, families and concerned citizens, DeVos shares a roadmap for reclaiming education and securing the futures of our kids – and America.

jason gray department of education: Research for Inclusive Quality Education Christopher Boyle, Kelly-Ann Allen, 2022-11-10 This book explores contemporary perspectives and research on inclusion, providing a platform for discussing inclusion at an international level and its intersections with belonging and equity. How inclusion is defined and applied between schools, districts, and even countries can vary markedly; thus, an international understanding of inclusion is urgently needed. Experts from several countries in different regions present the latest research in the field of inclusion and provide practices and strategies guided by empirical research to address some of these issues. Schools are contextual organisations that represent the broader society, culture, and values in which they reside. Thus, how inclusion is practised at the society level has an implication on schools. The way we think about inclusion has shifted dramatically in the last decade - we now recognise that inclusion represents a broad spectrum of racial, ethnic, cultural, and sexual diversity that is seen in almost all modern schools. This book presents international perspectives and research on inclusion, belonging and equity to work towards a more consistent, collaborative, and global understanding.
