center for black studies: The Future of Black Studies Abdul Alkalimat, 2022-07-20 'A timely, future-oriented and necessary contribution which provides clarity to the multivalent tendencies in this field' - Carole Boyce Davies The marginalisation of Black voices from the academy is a problem in the Western world. But Black Studies, where it exists, is a powerful, boundary-pushing discipline, grown out of struggle and community action. Here, Abdul Alkalimat, one of the founders of Black Studies in the US, presents a reimagining of the future trends in the study of the Black experience. Taking Marxism and Black Experientialism, Afro-Futurist and Diaspora frameworks, he projects a radical future for the discipline at this time of social crisis. Choosing cornerstones of culture, such as the music of Sun Ra, the movie Black Panther and the writer Octavia Butler, he looks at the trajectory of Black liberation thought since slavery, including new research on the rise in the

comparative study of Black people all over the world. Turning to look at how digital tools enhance the study of the discipline, this book is a powerful read that will inform and inspire students and activists.

center for black studies: *The History of Black Studies* Abdul Alkalimat, 2021-10-20 A surge of African American enrolment and student activism brought Black Studies to many US campuses in the 1960s. Sixty years later, Black Studies programmes are taught at more than 1,300 universities worldwide. This book is the first history of how that happened. Black Studies founder and movement veteran Abdul Alkalimat offers a comprehensive history of the discipline that will become a key reference for generations to come. Structured in three broadly chronological sections - Black Studies as intellectual history; as social movement; and as academic profession - the book demonstrates how Black people themselves established the field long before its institutionalisation in university programmes. At its heart, Black Studies is profoundly political. Black Power, the New Communist Movement, the Black women's and students' movements - each step in the journey for Black liberation influenced and was influenced by this revolutionary discipline.

center for black studies: *Culture Centers in Higher Education* Lori D. Patton, 2023-07-03 Are cultural centers ethnic enclaves of segregation, or safe havens that provide minority students with social support that promotes persistence and retention? Though Black cultural centers boast a 40-year history, there is much misinformation about them and the ethnic counterparts to which they gave rise. Moreover, little is known about their historical roots, current status, and future prospects. The literature has largely ignored the various culture center models, and the role that such centers play in the experiences of college students. This book fills a significant void in the research on ethnic minority cultural centers, offers the historic background to their establishment and development, considers the circumstances that led to their creation, examines the roles they play on campus, explores their impact on retention and campus climate, and provides guidelines for their management in the light of current issues and future directions. In the first part of this volume, the contributors provide perspectives on culture centers from the point of view of various racial/ethnic identity groups, Latina/o, Asian, American Indian, and African American. Part II offers theoretical perspectives that frame the role of culture centers from the point of view of critical race theory, student development theory, and a social justice framework. Part III focuses specifically on administrative and practice-oriented themes, addressing such issues as the relative merits of full- and part-time staff, of race/ethnic specific as opposed to multicultural centers, relations with the outside community, and integration with academic and student affairs to support the mission of the institution. For administrators and student affairs educators who are unfamiliar with these facilities, and want to support an increasingly diverse student body, this book situates such centers within the overall strategy of improving campus climate, and makes the case for sustaining them. Where none as yet exist, this book offers a rationale and blueprint for creating such centers. For leaders of culture centers this book constitutes a valuable tool for assessing their viability, improving their performance, and ensuring their future relevance - all considerations of increased importance when budgets and resources are strained. This book also provides a foundation for researchers interested in further investigating the role of these centers in higher education.

center for black studies: From Black Power to Black Studies Fabio Rojas, 2010-09-01 The black power movement helped redefine African Americans' identity and establish a new racial consciousness in the 1960s. As an influential political force, this movement in turn spawned the academic discipline known as Black Studies. Today there are more than a hundred Black Studies degree programs in the United States, many of them located in America's elite research institutions. In From Black Power to Black Studies, Fabio Rojas explores how this radical social movement evolved into a recognized academic discipline. Rojas traces the evolution of Black Studies over more than three decades, beginning with its origins in black nationalist politics. His account includes the 1968 Third World Strike at San Francisco State College, the Ford Foundation's attempts to shape the field, and a description of Black Studies programs at various American universities. His statistical analyses of protest data illuminate how violent and nonviolent protests influenced the establishment of Black Studies programs. Integrating personal interviews and newly discovered archival material, Rojas documents how social activism can bring about organizational change. Shedding light on the black power movement, Black Studies programs, and American higher education, this historical analysis reveals how radical politics are assimilated into the university system.

center for black studies: Forms of Fanonism Reiland Rabaka, 2010-03-08 When Frantz Fanon's critiques of racism, sexism, colonialism, capitalism, and humanism are brought into the ever-widening orbit of Africana critical theory something unprecedented in the annals of Africana intellectual history happens: five distinct forms of Fanonism emerge. Forms of Fanonism: Frantz Fanon's Critical Theory and the Dialectics of Decolonization is discursively distinguished from other engagements of Fanon's thought and texts insofar as it is the first study to consciously examine his contributions to Africana Studies and critical theory or, rather, the Africana tradition of critical theory. Forms of Fanonism identifies and intensely analyzes Fanon's contributions to the deconstruction and reconstruction of Africana Studies, radical politics, and critical social theory. In highlighting his unique solutions to the problems of racism, sexism, colonialism, capitalism, and humanism, five distinct forms of Fanonism materialize. These five forms of Fanonism allow contemporary critical theorists to innovatively explore the ways in which his thought and texts can be dialectically put to use in relieving the wretched experience of this generation's wretched of the earth. Critics can also apply these forms to deconstruct and reconstruct Africana Studies, radical politics, and critical social theory using their anti-imperialist interests. Throughout Forms of Fanonism, Reiland Rabaka critically dialogues with Fanon, incessantly asking his corpus critical questions and seeking from it crucial answers. This book, in short, solemnly keeps with Fanon's own predilection for connecting critical theory to revolutionary praxis by utilizing his thought and texts as paradigms and points of departure to deepen and develop the Africana tradition of critical theory.

center for black studies: Black Studies and the Democratization of American Higher Education Charles P. Henry, 2016-12-11 This book aims to expand what scholars know and who is

included in this discussion about black studies, which aids in the democratization of American higher education and the deconstruction of traditional disciplines of high education, to facilitate a sense of social justice. By challenging traditional disciplines, black studies reveals not only the political role of American universities but also the political aspects of the disciplines that constitute their core. While black studies is post-modern in its deconstruction of positivism and universalism, it does not support a radical rejection of all attempts to determine truth. Evolving from a form of black cultural nationalism, it challenges the perceived white cultural nationalist norm and has become a critical multiculturalism that is more global and less gendered. Henry argues for the inclusion of black studies beyond the curriculum of colleges and universities.

center for black studies: Africana Studies James L. Conyers, 1997 Known variously as African studies, black studies, African American studies, Afro-American studies, and Africology, the academic study of the African diaspora as a holistic discipline is a relatively new phenomenon. University programs have been created with reference to a disciplinary matrix, retarding the development of appropriate theory and methods throughout Africana studies. Fifteen leaders in the field of Africana studies provide the conceptual framework for establishing the field as a mature discipline. The focus is on four basic areas: administration and organizational structure; disciplinary matrix; Africana womanism; and cultural aesthetics. The work examines both the theory and the method of scholars in African and African-diaspora studies.

center for black studies: W.E.B. Du Bois and the Problems of the Twenty-First Century, **center for black studies: W. E. B. Du Bois and the Problems of the Twenty-First Century** Reiland Rabaka, 2008-04-29 W. E. B. Du Bois and the Problems of the Twenty-First Century utilizes Du Bois's thought and texts to develop an informed critical theory of contemporary society. This book broadens the base of critical theory, making it more multicultural, transethnic, transgender, and non-Western European philosophy focused by placing it in dialogue with theory and phenomena that had been heretofore woefully neglected. Taking the preeminent black intellectual of the twentieth century as his primary point of departure, Reiland Rabaka identifies and analyzes several key contributions that Du Bois and the black racial tradition offer to those interested in redeveloping and racially revising contemporary critical social theory. With chapters on critical race theory, postcolonial theory, feminism, and Marxism, this volume builds bridges from Africana Studies to disparate discursive communities, accessibly demonstrating Du Bois's, and the black radical tradition's, contributions to, and the potential impact on, a wide-range of new social scientific research and radical political struggles.

center for black studies: *The Challenge of Blackness* Derrick E. White, 2011-09-01 The Challenge of Blackness examines the history and legacy of the Institute of the Black World (IBW), one of the most important Black Freedom Struggle organizations to emerge in the aftermath of the assassination of Dr. Martin Luther King Jr. A think tank based in Atlanta, the IBW sought to answer King's question Where do we go from here? Its solution was to organize a broad array of leading Black activists, scholars, and intellectuals to find ways to combine the emerging academic discipline of Black Studies with the Black political agenda. Throughout the 1970s, debates over race and class in the United States grew increasingly hostile, and the IBW's approach was ultimately unable to challenge the growing conservatism. By using the IBW as the lens through which to view these turbulent years, Derrick White provides an exciting new interpretation of the immediate post-civil rights years in America.

The contributors to this book hope to influence this early phase in Black/Africana Studies historiography and provide a resource for discourse on the future of the discipline.
