jane seymour doctor quinn medicine woman: The Homeopathic Revolution Dana Ullman, 2007-10-16 What do Mark Twain, David Beckham, Catherine Zeta-Jones, and Mother Teresa have in common? All have been enthusiastic fans of homeopathy, the alternative medical tradition that treats "like with like." Homeopathy has an incredible history of support by many of the most respected people of the past 200 years, and modern science is finally catching up. In *The Homeopathic Revolution*, Dana Ullman blends vivid personal stories and quotes from these and other luminaries from a variety of eras and fields with a new definition of homeopathy as "nanopharmacology"—one that will help people, including skeptics, start to understand its value. After explaining why conventional medicine is inadequately scientific, why homeopathy makes sense and works, and why it is so threatening to conventional medicine and drug companies, Ullman lets legends like Coretta Scott King, Cindy Crawford, Bill Clinton, Vincent Van Gogh, and other practitioners weigh in on the subject.
