**brave new world ebook: *Brave New World (Indonesian Edition)*** Aldous Huxley, 2016-03-21 Dalam novel *Brave New World*, Aldous Huxley memperkenalkan sebuah dunia baru: dunia kita, beberapa abad di masa depan. Dunia di mana suatu pemerintahan telah berhasil menelusuri akar ketidakbahagiaan manusia, yang bermuara pada tiga hal: keluarga, seni, dan Tuhan. Demi menanggulangnya, bayi kemudian diciptakan dari dalam botol; melalui proses genetika yang canggih ia dihilangkan dari penyakit, dilepaskan dari kecacatan, untuk kemudian terbebas dari derita besar bernama orang tua. Tumbuh besar, mereka hanya belajar apa yang pemerintah ingin mereka pelajari. Maka seni pun dikebiri, menjadi tak lebih sekadar alat hiburan dan propaganda untuk masyarakat. Sementara sains dijadikan buku resep untuk hidangan industri. Konsumerisme diajarkan sebagai jalan hidup yang utama. Kitab suci diharamkan. Kebahagiaan dipusatkan pada dua sumber utama yakni seks bebas dan candu—konsumsinya dilegalkan dan dipantau ketat oleh pemerintah. Melalui cara-cara inilah perkembangan jiwa manusia berusaha diredam, karena apapun yang merangsang jiwa sesungguhnya adalah benih kegusaran yang pada akhirnya bakal menimbulkan ketidakstabilan masyarakat. Dengan melindungi status quo, maka kebahagiaan hakiki, utopia, dapat diraih. Tidak dengan murah memang, namun sekalinya tercapai, sistem sosial tersebut mustahil diruntuhkan. Sebuah tonggak keberhasilan peradaban manusia di depan alam serta Tuhan penciptanya. [Mizan, Bentang Pustaka, Hidup, Dunia, Tuhan, Bumi, Indonesia]

1. Introduction

Unquestionably, Aldous Huxley’s *Brave New World*, written in 1931, is one of the most fascinating dystopian novels. His description of a world state in the future, in which people are conditioned and manipulated from the cradle to the grave is meant to be a warning of the danger of dehumanization. Huxley draws a picture of a future including the misuse of political power, economic control, sciences and technology, biological engineering, mass consumption and the loss of ethical values. More precisely, Huxley’s *Brave New World* could be regarded as a kind of “leisure dystopia” which is defined as an “utopia [that has] gone wretched or failed paradise-engineering projects.” The fine line between utopia and dystopia becomes visible. In leisure dystopian societies like in *Brave New World*, all problems have officially been abolished and the people are living in wealth and happiness. But this state is only achieved by eliminating intellectualism, values or individual freedom. Therefore, the state rulers need means of control. One of the most powerful tools is conditioning in various forms. This study is meant to focus on the three types of conditioning prevailing in *Brave New World*. According to the order in the novel, the biological engineering in the pre-natal status will be discussed at first. Thereafter, the use of psychological conditioning with the methods of behaviourism, sleep-teaching and hypnopaedia is an essential theme. To complete it, the last type of conditioning, the chemical manipulation will be looked at. The different aspects will be combined with the motto of the World State in *Brave New World*: “Community, Identity, Stability” . Furthermore the loss of individuality caused by biological and psychological conditioning is an important component within the analysis. After this closer examination...

**brave new world ebook:** *After Human* Thomas Connolly, 2021-04-01 Shortlisted for the British Fantasy Awards (Non-Fiction) 2022 Shortlisted for the Locus Science Fiction Foundation Non-Fiction Award 2022 SF has long been understood as a literature of radical potential, capable of imagining entirely new worlds and ways of being. Yet SF has been slow to embrace posthumanist ideas about the human subject. The human of the SF tradition is instead a liminal being, caught somewhere between the transcendent ‘Man’ of classical humanism and the subversive ‘cyborg’ of posthumanist thought. This study offers a critical history of the ‘human’ in SF. By examining a range of SF works from 1818 to the 1970s, it seeks to answer some key questions: What role does technology play in defining what it means to be—or not to be—human? How do these writers understand the relationship between humanity and the rest of nature? And how can we use SF to re-examine our ethical position towards the non-human world and move to more egalitarian understandings of the human subject?

**brave new world ebook: Intentional Perspectives on Information Systems Engineering** Selmin Nurcan, Camille Salinesi, Carine Souveyet, Jolita Ralyté, 2010-06-17 Requirements engineering has since long acknowledged the importance of the notion that system requirements are stakeholder goals—rather than system functions—and ought to be elicited, modeled and analyzed accordingly. In this book, Nurcan and her co-editors collected twenty contributions from leading researchers in requirements engineering with the intention to comprehensively present an overview of the different perspectives that exist today, in 2010, on the concept of intention in the information systems community. These original papers honor Colette Rolland for her contributions to this field, as she was probably the first to emphasize that ‘intention’ has to be considered as a first-class concept in information systems engineering. Written by long-term collaborators (and most often friends) of Colette Rolland, this volume covers topics like goal-oriented requirements engineering, model-driven development, method engineering, and enterprise modeling. As such, it is a tour d’horizon of Colette Rolland’s lifework, and is presented to her on the occasion of her retirement at CaISE 2010 in Hammamet, the conference she once cofounded and which she helped to grow and prosper for more than 20 years.
